

UX Design Storyboard

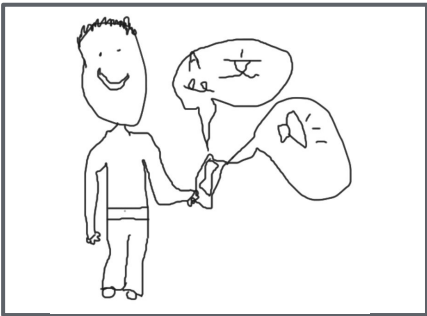

Scenario: An app to help users with disabilities and speakers of different languages purchase a ticket to the movie theater - big picture

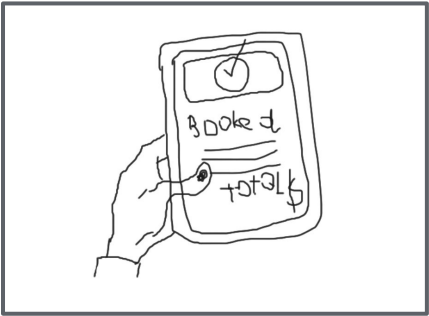

Joseph wants to go to the cinema but he remembers it is difficult for him due to visual impairment and language barrier.

Joseph remembers an app that can help

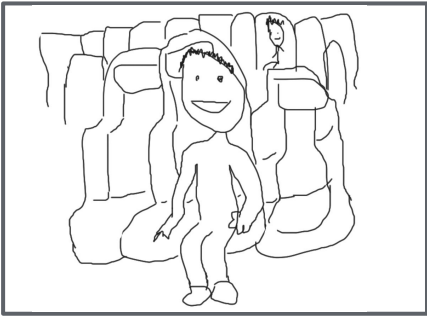

Joseph select his native language and use voice assistant technology in our app

Joseph completes the process of purchasing ticket seamlessly

At the cinema, Joseph pick up the popcorn set order made earlier in the app

Joseph is satisfied with effective purchase process and now can fully enjoy his movie-experience
