

When will I receive feedback from my peers?

You'll get your grade within 7 days as long as at least one of your peers reviews your assignment. It may take 7-10 days to get a review from your peers.

When you get feedback, you may see the name of the learner who gave it. If your instructor has anonymous feedback turned on, you'll see a notice at the top of the feedback for the assignment.

I can't submit my assignment

If you can't submit your assignment, make sure that your answers are all over the minimum word limit.

You may not be able to submit your assignment if your answers are too similar to another learner's submission. Please keep in mind that plagiarism is against the [Coursera Honor Code](#).

If you see a notification letting you know that your assignment answers are similar to another learner's submission, you'll need to update your response before submitting.

Once you've updated your answers with original work, the **Submit for review** button will appear.

If you need more time to work on your assignment, you can click **Save draft** and come back to it later.

If you think you shouldn't be seeing this error, you can click the link below the notification to let us know. You'll be able to submit your assignment after you edit your answers.

If you aren't seeing any error messages, but are still not able to submit your assignment, try these [troubleshooting steps](#).

Attempt limits

Some private courses (such as courses in a Degree or MasterTrack program) may have a limit on how many times you can submit a peer-reviewed assignment.

If there's an attempt limit for your assignment, you'll see an 'Attempts' section listed near the top of the page when you open the assignment.

If you meet the attempt limit and need help with your grade, you can reach out to your program support team. You can find your dedicated support email address in the onboarding course for your program.

Save your work as a draft

If you want to start working on an assignment but you don't want to submit it yet, you can save it as a draft. When you save an assignment as a draft:

- You can work on your saved draft from any computer or device if you log in with your Coursera account.
- No one will be able to see or review your work until you submit it.
- You can save a draft as many times as you want before submitting it.

To save an assignment as a draft, click **Save draft** when you're working on it.
